About Your Keyboard

An Introduction to Your New Belkin Multimedia Keyboard

This keyboard is perfect for users who desire high-performance features at an economical price. It features the highest quality and design, including high-quality data markings that ensure the durability of all letters and symbols. Bothersome key clicking noise is eliminated by high-quality membrane rubber employing our QuietType™ technology. Of course, all Belkin keyboards are compatible with your Microsoft® Windows® operating systems.

The Multimedia still has the familiar layout that you are used to. Using a QuietType™ membrane with soft tactile keys will ensure you ease of use and a comfortable feel. With a 20-million keystroke operating life and a larger-sized "Enter" key, you can expect reliable and convenient performance for years to come.

You will also notice that your keyboard comes with a "Turbo" key, located just below the "Enter" key. When combined with your function keys (F1 through F12) the "Turbo" key will adjust your cursor speed for backspacing, deleting, or using the arrow keys.

Connecting Your Keyboard

1. Turn off all the power to your computer.

2. Remove the existing keyboard (if installed).

3. Align the PS/2 connector to the keyboard port and gently insert.

4. Turn on your computer, and the keyboard is ready.

Software Installation

Note: It is not necessary to install this multimedia driver if your operating system is Windows Me.

1. Insert the driver CD into your CD-ROM drive.

2. The welcome screen will appear.

3. Move cursor below the words "Multimedia Installer" (cursor will change to hand icon) and click once.

Note: Memory Card Installer does not function with this model.

4. Follow the on-screen instructions.

5. You will be prompted to re-start your computer. Choose "yes", and restart your computer at this time.

Changing Drive Letter

If your PC is equipped with both a DVD/VCD and a CD writer, the media player keys may not work properly. You may have to change the drive letter(s) as instructed below.

1.   Click "Start"/"Settings"/"Control Panel".

2.   Double-click the "System" icon; the system properties window will open.

3.   Click "Device Manager Label". There are two CD-ROM devices, DVD and CD writer.

4.   Highlight the DVD device and click the "Properties" button.

5.   Change the "Start" drive letter and the "End" drive letter from F to E, for example, and then click "OK".

6.   Highlight the CD writer device and click the "Properties" button.

7.   In CD writer properties, change the "Start" drive letter and the "End" drive letter from E to F, and then click "OK".

8.   After changing the drive letter, the system will request to restart your computer.

Using Your Multimedia Function Keys

Activating Multimedia Hot Keys

The multimedia functions can be set to "on" or "off" by holding down the "Turbo" key and pressing F12. The LEDs above the SCROLL and 2000 indicators located in the upper right-hand corner will be illuminated.

Reconfiguring Multimedia Hot Keys

The following hot keys can be reconfigured: "Media" key,
"Calculator" key, "My Computer" key, and "Mail" key.

1.   Click "Start"/"Programs"/"Multimedia Keyboard".
      Multimedia keyboard properties will be pop-up.
      (Other buttons like Portal, News, Finances, Shopping,
      Entertainment, and People are not available on
      this model.)

2.   Click the "Media" button, for example.

3.   On the pop-up configure button, there are two
      selections: "Functions" and "Launch Application
      or Website".

4.   Click the check box for "Functions" and select "My
      Documents". Now the "Media" hot key of the keyboard
      becomes the "My Documents" hot key.

Reconfiguring "Launch Application or Website" Hot Key Assignments

1. Click "Start"/"Programs"/"Multimedia Keyboard".

2. Click the check box "Launch Application or Website".

3. Key in the URL address that you want to browse when you press "Media" hot key. Or you can key in an application path to activate any application you want.
