INTRODUCTION

TuneCast Auto charges your iPod while you play your music over your car's FM radio. Now you can use your iPhone or iPod touch to control your TuneCast Auto. Just download the free ClearScan LIVE app from the App Store (see instructions on the next page).

GET THE CLEARSCAN LIVE APP

ClearScan LIVE lets you control your TuneCast Auto LIVE directly from your iPhone or iPod touch. ClearScan LIVE also provides improved ClearScan results by:

• Using your GPS location to find the best FM station in your area

• Recommending open stations based on what other people in your area are using

Look for ClearScan LIVE in the App Store on iTunes. See instructions in the app's Help section for more information.

CONNECT YOUR TUNECAST AUTO

1. Turn down your stereo's volume.

2. Connect your TuneCast Auto to the cigarette lighter or power outlet in your vehicle.
3. Connect your iPhone or iPod to your TuneCast Auto.
Note: In order to comply with government regulations, European versions of TuneCast Auto will automatically turn off if there is no audio for approximately 60 seconds. It will automatically turn on when it detects audio from your iPhone or iPod. You can also press the "m1" or "m2" button to turn on your TuneCast Auto.

FIND AN OPEN FM STATION

There are two ways to find an open FM station: by using ClearScan or selecting an FM station manually.

Use ClearScan to find the best station (recommended)

Your TuneCast Auto uses ClearScan technology to constantly scan for the clearest FM frequency in your area.

1. Press the   "ClearScan" button. Your TuneCast Auto will display the best frequency.
2. Tune your stereo to the frequency on your TuneCast Auto display.

Find a station manually

If you want to transmit on a specific frequency, you can manually select it on your TuneCast Auto:

1. First, tune your car radio to an open station, one that plays only static or has a very weak radio signal.

2. Press the + or - button on your TuneCast Auto to select the same station.
To identify the best available frequencies in your area, visit www.belkin.com/mybestfm.

Save and select stations

You can save two stations using the "m1" and "m2" buttons.

1. To save a station, select the desired frequency on your TuneCast Auto using the + or - buttons.

2. Press and hold the "m1" or "m2" button for two seconds. The "m1" or "m2" icon will flash on the screen when the station is saved.

3. To recall a saved station, press the "m1" or "m2" button. Your TuneCast Auto will change to the saved station.

USE THE PRO BUTTON TO BOOST SOUND

If you find the sound is too weak, press "PRO" to boost the sound coming from your iPod.
PRO will cycle through the following settings:

PRO Setting	Use for…	Description
Normal	All types of audio	No change to audio
PRO 1	Most types of music	Increases the average volume of the audio
PRO 2	Quieter music	Increases the average volume more than PRO 1; may cause distortion of louder music
PRO◗	Audio books, mono recordings, podcasts	Increases the average volume and transmits in mono
	Try this if you do not receive a clear signal

Charge your iPhone or iPod

Your TuneCast Auto will charge your iPhone or iPod while it is connected to a power outlet and receiving power. If your iPhone or iPod is not charging, make sure your TuneCast Auto is correctly connected to the power outlet and that your iPhone or iPod is securely connected to your TuneCast Auto. The indicator light on the cigarette lighter adapter should be lit.

Note: Some vehicles do not provide power to the power outlet unless the vehicle is in ignition mode or the engine is running.

Optimize the sound quality of your TuneCast Auto

A variety of car radio and antenna configurations are available and you may optimize the sound quality in your car based on the location of your TuneCast Auto (for example, placing the TuneCast Auto on the center console may yield better performance than other locations within your vehicle).

SAFETY WARNINGS

Do not attempt to connect your TuneCast Auto while driving. Make sure your TuneCast Auto fits securely and firmly into the power outlet before driving.

Do not attempt to adjust or retrieve an unsecured TuneCast Auto or iPhone or iPod while driving. Position the TuneCast Auto so that both the TuneCast Auto and the iPhone or iPod do not interfere with any of the operating controls of the car.

Do not insert any objects other than the cigarette lighter adapter into the power outlet without disconnecting the battery of the car first. Failure to observe this safety warning can result in injury or property damage.

Belkin does not assume any responsibility for personal injury or property damage incurred due to hazardous driving as a result of interaction with the TuneCast Auto, the iPhone or iPod, or the vehicle's power outlet.
